MODERNGLIDE

SERVICING YOUR MOVABLE WALLS

WHAT WE DO

ModernGlide delivers stylish and highly functional movable acoustic partitions to meet every need.

Our approach starts with a free consultation and a free no-obligation quotation. It ends with an installation finely tuned to the customer's needs.

Our years of experience, and a skilled specialist team, find the best solutions and budgetary match every time. With an appointed project manager from start to finish.

The head office is based in Surrey, with experienced staff offering national coverage throughout the UK.

WHO WE ARE

ModernGlide Ltd is owned by business partners Neil O'Halloran and Aran Meadows who share 40 years' experience in supplying movable acoustic partitions.

Our approach to business can be summed up in two simple phrases – 'we can' and 'we care'.

To put it simply – We can – We've diligently searched out the very best product solutions from the UK, Europe and beyond. This, together with our extensive experience and delight in finding answers, is what we bring to our customers. We care – This is our company.

Our name and personal reputation goes with every installation. So we want to be the best and do our best – time and time again.

ModernGlide are suppliers and installers of glass movable walls, folding partitions and acoustic glazed doors, meeting the needs of clients nationwide. Our reputation has been built on the fitting of high-end operable walls of the highest quality.

Our experienced fitting and maintenance engineers provide a comprehensive service to keep your glass movable walls and sliding folding partitions in top working order. This can include one-off servicing and maintenance or ongoing yearly contractual support with a full guarantee on all work undertaken.

OUR SERVICING COVERS:

Existing Installations – With almost no exception, our servicing team can keep your existing installation working irrespective of which manufacturer created the original product. New ModernGlide Installations – In harmony with our standard warranty, we can create a service plan to protect your investment.

SERVICING KEY FACTS

- Cleaning and lubrication to the track and roller system
- Roller inspections and replacements
- Panel adjustments
- Operable seal checks
- Profile inspections
- Replacement parts and operating handles
- Relocation of existing operable walls
- Full service reports

- Top hung or floor supporting options

SEE PAGE 9

BI-FOLDING DOORS

MG900-G

- Top hung or floor supported options available
- Aluminium thermally broken or timber framed
- Weather tested to current legislations

SEE PAGE 13

MOVABLE ACOUSTIC WALLS

MG100-S

Ideally suited for high specification movable wall projects, due to their flexibility, extensive stacking arrangements and high acoustic qualities.

The made to measure panels are operated by an internal retractable mechanism and move quietly and quickly along the head track. In their closed position the operable wall panels are secure and ridged.

A semi-electric option offers an even greater ease of use.

KEY FACTS

- Acoustic reduction from 37dB to 60dB
- Top hung with no floor track
- Panel widths 650mm to 1250mm
- Height up to 10 metres
- Passdoor options
- Semi electric top and bottom seal options
- Versatile stacking via single or double point suspension
- Finishes include, melamine, laminate, veneer and white board
- Integral glazing options

SLIDING FOLDING PARTITIONS

MG200-S

Our most popular solution for acoustic partitions that move. This continuously hinged acoustic partition system is perfect for a quick and easy set up process.

This system has a passdoor panel as standard, allowing movement within the divided areas with ease.

No top support needed. Ideal for smaller openings with slim line stacking.

KEY FACTS

- Acoustic reduction from 38dB to 49dB
- Top hung or floor supported
- Panel widths 250mm to 900mm
- Height up to 4000mm
- Passdoor as standard.
- Centre folding or end folding stacking options
- Panel finishes include, melamine, laminate, veneer and white board
- Integral glazing options

CONCERTINA VINYL / TIMBER

STRAIGHT SLIDING DOOR

MG300-S

A quick, practical and flexible room divider.

Taking seconds - and only one movement - to divide your space with this concertina partition.

Manufactured with budget in mind, these vinyl concertina partitions offer a true low-cost solution. This system is ideal for installations within nurseries, village halls and hospitals.

KEY FACTS

- Acoustic reduction from 15dB to 46dB
- Top-hung or floor-supporting
- Height up to 6000mm in timber
- Panel finishes include vinyl, melamine, laminate and veneer
- Lightweight
- Multiple stacking options
- Vision panel option

MG400-S

This is a quick and easy way of closing off spaces with a pull-and-push straight sliding panel system.

It is ideal for where space limitations call for a stacking partition system that takes up limited space.

KEY FACTS

- Acoustic reduction from 37dB to 46dB
- Top-hung or floor-supporting
- Height up to 4,000mm
- Vinyl, melamine and veneer finishes
- Door ironmongery as standard
- Inline or pocket stacking

FLUSH GLAZED WALL

FLUSH GLAZED WALL

MG600-S

Each panel is constructed with an aluminium frame and finished with a flush sheet of toughened glass to both sides of the panel – so giving a flush glazed appearance.

These panels retain a room's spacious sense of proportion and maximises light and clear viewing lines. The aluminium frame can be coloured to match your design needs.

KEY FACTS

- Acoustic reduction from 37dB to 45dB
- Inset or full height passdoor options
- Top-hung so no need for a floor track
- Height up to 4,000mm
- Frames powder coated to match any RAL colour
- Retractable top and bottom seals
- Semi-electric seal options

MG700-S

An individual glass panel system with top and bottom rails, single glazed with minimal stacking space. Pivot door panel as standard. The system creates space and privacy while still providing the sense of an open and light area.

Top and bottom rails are finished in either satin-anodised aluminium or colour powder-coated to your design needs. Option for an inset passdoor within the opening.

KEY FACTS

- 600mm to 1200mm wide panels
- Up to 4,000mm in height
- Inset door option
- Top-hung only
- Manifestation options
- Section of ironmongery
- Various stacking options
- Top and bottom rails powder coated to choice of RAL colour options
- Straight sliding options

GLAZED ACOUSTIC DOOR

MG800-G

We are proud to have helped design and manufacture a double-glazed door to fit within glass or solid partitions.

The 44mm thick doors can achieve up to Rw 42dB. And there are unique drop seals within the panel frame.

KEY FACTS

- Up to 3000mm in height
- Frame colour to suit
- Ironmongery as standard
- Internal blind options
- Pivot or hinged fitting options
- Straight sliding option

BI-FOLDING DOORS

MG900-G

Minimum maintenance required to keep these bi-folding doors looking great, making the 70mm thick aluminium system one of our most popular.

Each panel is thermally broken for a greater thermal efficiency and each standard panel is manufactured with both a top and bottom roller. Offers the choice of high-end flush double-glazed, aluminium or timber finishes.

BI-FOLDING DOORS KEY FACTS

- Flush and double-glazed options
- Aluminium or timber frame options
- Weatherproof
- Easy to operate
- Robust hardware
- Low thresholds
- Top-hung or bottom-supporting
- Security hinges
- Single opening stacking or bi-folding at both ends
